

LIST OF TABLES

Table	TITLE	Page
1.1	Ten most serious problems showing ‘serious ranking’ of behavioural problems by different groups of people.	12
3.1	The sex wise literacy rate of Assam along with the Kamrup Districts (both Metro and Rural)	127
3.2	List of the sample schools selected for the present study	131
3.3	List of age wise identified behavioural problem children	132
3.4	Distribution of sample teachers selected for the present study	134
3.5	Monthly income group of the family	140
3.6	Category of academic achievement of behavioural problem children	143
4.1	The identified behavioural problem children	152
4.2	The prevalence of behavioural problems among primary school children	153
4.3	The existence of behavioural problems of identified primary school children	154
4.4	The existence of behavioural problems in relation to age of the children	157
4.5	The chi-square value of the existence of behaviour problems in relation to the age of the children	159
4.6	The common behavioural problems of primary school children in relation to age.	159
4.7	The Chi-Square value of common behavioural problems of primary school children in relation to age.	161
4.8	The existence of behavioural problems in relation to the gender of the children	163
4.9	The chi-square value of the existence of behavioural problems in relation to the gender of the children	164

4.10	The common behavioural problems in relation to the gender of the children	165
4.11	The chi-square value of common behavioural problems in relation to the gender of the children	166
4.12	The existence of behavioural problems in relation to the number of children in the family	168
4.13	The chi-square value of existence of behavioural problems in relation to the number of children in the family	170
4.14	The inattention behavioural problem in relation to the number of children in the family	170
4.15	The chi-square value of inattention behavioural problem in relation to the number of children in the family	172
4.16	The hyperactivity behavioural problem in relation to the number of children in the family	172
4.17	The chi-square value of hyperactivity behavioural problem in relation to the number of children in the family	174
4.18	The ADHD behavioural problem in relation to the number of children in the family	174
4.19	The chi-square value of ADHD behavioural problem in relation to the number of children in the family	176
4.20	The conduct behavioural problem in relation to the number of children in the family	176
4.21	The chi-square value of conduct behavioural problem in relation to the number of children in the family	178
4.22	The anxiety/depression behavioural problem in relation to the number of children in the family	178
4.23	The chi-square value of anxiety/depression disorder problem in relation to the number of children in the family	180
4.24	The existence of behavioural problems in relation to the birth order of the children among the siblings	181
4.25	The chi-square value of the existence of behavioural problems in relation to the birth order of the children among the siblings	182

4.26	The common behavioural problems in relation to the birth order of the children among the siblings	183
4.27	The chi-square value of common behavioural problems in relation to the birth order of the children among the siblings	184
4.28	The existence of behavioural problems of primary school children in relation to type of family	187
4.29	The chi-square value of the existence of behavioural problems of primary school children in relation to type of family	189
4.30	The common behavioural problems of primary school children in relation to type of family	189
4.31	The chi-square value of common behavioural problems of primary school children in relation to type of family	191
4.32	The existence of behavioural problems of primary school children in relation to nature of family	193
4.33	The chi-square value of existence of behavioural problems of primary school children in relation to nature of family	194
4.34	The inattention behavioural problem of primary school children in relation to nature of family	195
4.35	The chi-square value of inattention behavioural problem of primary school children in relation to nature of family	196
4.36	The hyperactivity behavioural problem of primary school children in relation to nature of family	197
4.37	The chi-square value of hyperactivity behavioural problem of primary school children in relation to nature of family	198
4.38	The ADHD behavioural problem of primary school children in relation to nature of family	199
4.39	The chi-square value of ADHD behavioural problem of primary school children in relation to nature of family	200
4.40	The conduct behavioural problem of primary school children in relation to nature of family	200
4.41	The chi-square value of conduct behavioural problem of primary school children in relation to nature of family	202

4.42	The anxiety/depression disorder behavioural problem of primary school children in relation to nature of family	202
4.43	The chi-square value of anxiety/depression disorder behavioural problem of primary school children in relation to nature of family	204
4.44	The existence of behavioural problems of primary school children in relation to size of family	205
4.45	The chi-square value of the existence of behavioural problems of primary school children in relation to size of family	206
4.46	The inattention behavioural problem of primary school children in relation to size of family	207
4.47	the chi-square value of inattention behavioural problem of primary school children in relation to size of family	208
4.48	The hyperactivity behavioural problem of primary school children in relation to size of family	208
4.49	The chi-square value of hyperactivity behavioural problem of primary school children in relation to size of family	210
4.50	The ADHD behavioural problem of primary school children in relation to size of family	210
4.51	The chi-square value of ADHD behavioural problem of primary school children in relation to size of family	212
4.52	The conduct behavioural problem of primary school children in relation to size of family	212
4.53	The chi-square value of conduct behavioural problem of primary school children in relation to size of family	214
4.54	The anxiety/depression behavioural problem of primary school children in relation to size of family	214
4.55	The chi-square value of anxiety/depression behavioural problem of primary school children in relation to size of family	216
4.56	The existence of behavioural problems of primary school children in relation to educational qualification of mothers	217

4.57	The chi-square value of existence of behavioural problems of primary school children in relation to educational qualification of mothers	219
4.58	The existence of behavioural problems of primary school children in relation to educational qualification of fathers	220
4.59	The chi-square value of the existence of behavioural problems of primary school children in relation to educational qualification of fathers	222
4.60	The existence of behavioural problems of primary school children in relation to occupation of mothers	223
4.61	The chi-square value of existence of behavioural problems of primary school children in relation to occupation of mothers	225
4.62	The existence of behavioural problems of primary school children in relation to occupation of fathers	226
4.63	The chi-square value of the existence of behavioural problems of primary school children in relation to occupation of father	227
4.64	The existence of behavioural problems of primary school children in relation to monthly income of family	228
4.65	The chi-square value of the existence of behavioural problems of primary school children in relation to monthly income of family	230
4.66	The inattention behavioural problem of primary school children in relation to monthly income of family	230
4.67	The chi-square value of inattention behavioural problem of primary school children in relation to monthly income of family	232
4.68	The hyperactivity behavioural problem of primary school children in relation to monthly income of family	232
4.69	The chi-square value of hyperactivity behavioural problem of primary school children in relation to monthly income of family	234

4.70	The ADHD behavioural problem of primary school children in relation to monthly income of family	234
4.71	The chi-square value of ADHD behavioural problem of primary school children in relation to monthly income of family	236
4.72	The conduct behavioural problem of primary school children in relation to monthly income of family	236
4.73	The chi-square value of conduct behavioural problem of primary school children in relation to monthly income of family	238
4.74	The anxiety/depression behavioural problem of primary school children in relation to monthly income of family	238
4.75	The chi-square value of anxiety/depression disorder of primary school children in relation to monthly income of family	240
4.76	Mean, Standard Deviation and Standard Error of mean of the children having and not having inattention behavioural problem in relation to some parenting styles.	241
4.77	't' test showing significance of mean difference in inattention behavioural problem in different dimensions of parenting style	243
4.78	Mean, Standard Deviation and Standard Error of mean of the children having and not having hyperactivity behavioural problem in relation to some parenting styles	245
4.79	't' test showing significance of mean difference in hyperactivity behavioural problem in different dimensions of parenting style	247
4.80	Mean, Standard Deviation and Standard Error of mean of the children having and not having ADHD behavioural problem in relation to some parenting styles	249
4.81	't' test showing significance of mean difference in ADHD behavioural problem in different dimensions of parenting style	251

4.82	Mean, Standard Deviation and Standard Error of mean of the children having and not having conduct behavioural problem in relation to some parenting styles	252
4.83	't' test showing significance of mean difference in conduct behavioural problem in different dimensions of parenting style	254
4.84	Mean, Standard Deviation and Standard Error of mean of the children having and not having anxiety/depression behavioural problem in relation to some parenting styles	255
4.85	't' test showing significance of mean difference in anxiety/depression behavioural problem in different dimensions of parenting style	257
4.86	Mean, Standard Deviation and Standard Error of mean of the children having and not having inattention behavioural problem in relation to some selected school related factors	260
4.87	t' test showing significance of mean difference in inattention behavioural problem in relation to some selected school related factors	262
4.88	Mean, Standard Deviation and Standard Error of mean of the children having and not having hyperactivity behavioural problem in relation to some selected school related factors	263
4.89	t' test showing significance of mean difference in hyperactivity behavioural problem in relation to some selected school related factors	264
4.90	Mean, Standard Deviation and Standard Error of mean of the children having and not having ADHD behavioural problem in relation to some selected school related factors	265
4.91	t' test showing significance of mean difference in ADHD behavioural problem in relation to some selected school related factors	267
4.92	Mean, Standard Deviation and Standard Error of mean of the children having and not having conduct behavioural problem in relation to some selected school related factors	268

4.93	t' test showing significance of mean difference in conduct behavioural problem in relation to some selected school related factors	269
4.94	Mean, Standard Deviation and Standard Error of mean of the children having and not having anxiety/depression behavioural problem in relation to some selected school related factors	271
4.95	t' test showing significance of mean difference in anxiety/depression behavioural problem in relation to some selected school related factors	272
4.96	The academic performances of the behavioural problem children	274
4.97	The academic performances of the behavioural problem children along with their existence of behavioural problems	275
4.98	The chi-Square value of Academic performance and the existence of behavioural problems of primary school children	276
4.99	The academic performances of the children having common behavioural problems	277
4.100	The Chi-Square value of common behavioural problems of primary school children in relation to their academic achievement	279
