

LIST OF TABLES

- Table 2.1: Conscious table of the literature review
- Table 3.1 : Tabular representation of various number of Provincialised Colleges of Assam and study centres under KKHSOU
- Table 3.2 : Sample size of respondents selected for the study
- Table 3.3 : Tabular presentation of the sample selected for study
- Table 3.4: Reliability for questionnaires of learners of ODL/Conventional mode of education
- Table 3.5: Reliability for questionnaires of Teachers/Counselors of ODL/Conventional mode of education
- Table 4.1: Data representing the percentage of the response of the learners of Conventional/ODL mode of education system in connection with the quality of the structure of the course
- Table 4.2: T-test value for the quality of structure of the course
- Table 4.3: Data representing the percentage of the response of the learners of Conventional / ODL mode of education system in connection with the quality of the support given by the teacher / counsellors
- Table 4.4: T-test value for the quality of support given by teachers/counselors
- Table 4.5: Data representing the percentage of the response of the learners in connection with the quality of Teachers / Counselors of Conventional / ODL mode of education system
- Table 4.6: T-value for quality of teachers/ counselors from learners' point of view
- Table 4.7: Data representing the percentage of the response of the learners in the quality of learning experience of the Conventional / ODL mode of education system

- Table 4.8: T-value for the quality of learning experiences from learner's point of view
- Table 4.9: Data representing the percentage of the response of the learners in comparative view of Conventional / ODL mode of education system
- Table 4.10: T-value for the comparative view in conventional/ ODL system of education from learner's point of view
- Table 4.11: Data representing the percentage of the response of the learners in comparative view of the Conventional / ODL mode of education system in respect of examination system
- Table 4.12: T-value for comparative view in conventional/ODL mode of education in respect to examination system from learner's point of view
- Table 4.13: T-value for learner's attitude towards the quality of conventional/ODL system of education
- Table 4.14: Data representing the percentage of the response to find out the reason of joining Conventional / ODL mode of education system from learner's point
- Table 4.15: T-value for joining to conventional/ ODL mode of education system
- Table 4.16: Data representing the percentage of the response to study the effectiveness of study materials / text book of Conventional / ODL mode of education system from learner's point of view.
- Table 4.17: T-value for the effectiveness of study materials/text book of conventional/ODL mode of education
- Table 4.18: Data representing the percentage of the response to study the usefulness of ICT in the study area from the learner's point of view.
- Table 4.19: T-value for the usefulness of ICT from learners' point of view
- Table 4.20: Data representing the percentage of the response to find the cost effectiveness of existing undergraduate courses under conventional and open and distance learning system.

- Table 4.21: T-value for the cost effectiveness of conventional/ODL system of education
- Table 4.22 : Correlation value of quality and cost of conventional education system.
- Table 4.23 : Correlation value of quality and cost of ODL education system.
- Table 4.24 : Correlation value of quality and cost of both the systems(Conventional and ODL system)
- Table 5.1: Data representing the percentage of the response of the learners in comparative view form teachers/ Counselor's point of view
- Table 5.2: T-value for comparative view for conventional/ODL from teachers/counselors point of view
- Table 5.3: Data representing the percentage of the response of comparative view of the Conventional / ODL system of education in respect of education system from teachers/Counsellor's point of view
- Table 5.4: T-value for comparative view in connection with examination system from teachers/counselors point of view
- Table 5.5: Data representing the percentage of the response to study the effectiveness of study materials / text book of Conventional / ODL mode of education system from Teachers / Counsellors point of view.
- Table 5.6 : T-value for the effectiveness of study materials/text book of conventional/ODL mode of education
- Table 5.7: Data representing the percentage of the response from counselor's point of view of Conventional / ODL mode of education system in connection with ICT
- Table 5.8: T-value for the usefulness of ICT from teachers/counselors point of view
- Table 6.1 : Consolidated statement of major findings
